

HISTOPATHOLOGY

Research Studies at an early Stage of Development:
Method Development/Evaluation of ecotoxic Effects on Corals,
Fish, Macroalgae, Plant and Invertebrate Tissues

Tissue Screening with Focus on

- Effects caused by Endocrine Disruptors
- Effects caused by Aquaculture
- Effects caused by Pathogens
- Effects caused by Chemicals
- Effects caused by Antibiotics

Screening Studies

- Minimizing Environmental Risk
- Description of Diseases
- Monitoring of Polluted Areas
- Evaluation of Negative Impacts on Fish Health
- Identification of Healthy Fish for Farming and Restocking

Share knowledge, bring expertise and people together
to find solutions in a complex and changing world!
